## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 2, 6-10, 14-16, 19 and 21 are allowed.
2. The following is an Examiner's Statement of Reasons for Allowance:

In interpreting the claims, in light of the specification and the applicant's amendments filed March 14th, 2008, the Examiner finds the claimed invention to be patentably distinct from the prior art of record. The prior art does not teach all of the limitations of the independent claims in combination with the other elements presented.

The prior art of record teaches the use of a removable medium with a position address stored thereon (see Ehara, abstract). The medium is used to initiate a file transfer of one or more read files to a specific region on a server specified by the included information (see Ehara, process of paragraphs 0061-0063 and the corresponding flowchart of fig. 3). Other prior art teaches a graphical user interface that includes an optionally recordable file transfer protocol interaction with a database (see Zondervan, fig. 18, col. 4, lines 11-21, and col. 26 example at lines 45-59). The user interface further includes setting an indication by a user (see Zondervan, col. 16, lines 45-63 file transfer setting) before the transmission of one or more selected files (see col. 18, lines 43-53 and specifically fig. 28 where a "Delete after upload" indication is available).

However, as per amended claims 1, 2, 6-10, 14-16, 19 and 21, the prior art fails to teach a file transfer method for transferring one or more files recorded on a removable medium via a network to a predetermined location, where the medium includes location information of a predetermined server that is a transfer destination, where a display shows a first display menu upon reading the recordable medium, where the first display includes a menu to for a user to select whether to delete the files to be transferred from the medium after the transfer, and where a second display menu shows if the indication acquired by the first deletion step is not to delete all of the one or more files to be transferred. This occurs in a series of method steps that further includes a next selecting step of selecting the one or more files stored in the medium to be transferred in a reading step, followed by a file transfer step that transfers all of the files to a specific region on a specific server depending upon what was earlier selected, followed by a confirmation step of confirming reception by a predetermined server, followed by deleting certain files that were earlier indicated in one of the deletion designating steps.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
